Custom Micron

Absolute Precision for the Elite Professional

For the elite professional who demands precise and accurate control of very detailed spraying, the Custom Micron Series is built to be the "best of the best", hand-tested and adjusted by the world's leading airbrush technicians.

13407730

CM-C Plus

- 0.23 mm nozzle
- A breakthrough technology, the Micro Air Control (MAC) Valve enables infinite control of the airflow at the head of the airbrush, which provides even more control of stippling, fine details and finely atomized background spraying
- The new solvent-proof Teflon™ needle packing allows for the use of automotive or other solvent-based paints
- The funnel shape of the redesigned gravity-feed cup lets the airbrush be used with only a couple of drops of paint, ensuring a fast and thorough clean up
- A cutaway handle enables users to grab the needle-chucking nut and quickly pull back the needle to flush paint out of the cup and paint passageways for a quick and easy clean up

13407520

CM-C

- 0.23 mm nozzle
- Ideal for professional use where heavier paints are required or when larger work is being created
- The Iwata Custom Micron matched-head system ensures superior atomization
- Features a larger 1/3 oz. (9 ml) gravity-feed color cup for working with large volumes of paint

Custom Micron Head System Superb Performance

The unique feature of the hand-matched head system means all of the parts in the head are assembled, tested and adjusted until the spray characteristics are as perfect as an airbrush can be. Available only as a set, the head systems can be interchanged for maximum reliability and ultimate performance. Spare head systems can be purchased to ensure the Custom Micron will always spray to its fullest potential.

The unique test spray pattern is included with all Custom Micron Series and High Performance Series Airbrushes.

13407500

13407510

CM-SB

- 0.18 mm nozzle
- The same features of the Custom Micron B except it has a 1/8 oz. (3.5 ml) side-feed cup, which is engineered for right- and left-handed use
- Because it is side-fed, a view directly over the top of the airbrush allows for up-close, fine detail work
- For larger artwork, the Custom Micron versatility is enhanced by an optional 1/4 oz. (7 ml) side-feed cup, 1/2 oz. (14 ml) gravity-feed cup or a 1 oz. (28 ml) siphon bottle

Featuring the ultimate in air control directly at the nozzle with Iwata's new Micro Air Control (MAC) Valve Technology, the Hi-Line Series is designed for artists who need extreme control of detailed spraying.

The Hi-Line Series is now made with Teflon needle packing, a dual-purpose cutaway, pre-set handle and one-piece auxiliary lever/needle chucking guide.

- The gravity-feed cup features a smooth inside taper that provides for a quick and easy clean up

- The gravity-feed cup is useful for mixing custom colors and allows for quick color changes
- Short paint passageway from the cup to the front of the airbrush gives it a responsive feel and allows it to be one of the quickest airbrushes in the industry

NANO SERIES™

When we started to make the original stencils in the Artool® lineup smaller for, well... smaller jobs, the prospect came up that we should design a specific series for the smallest projects out there namely the RC car market, 1/8 - 1/25 scale models and diecast kustoms. At the size of a business card, the Artool® Freehand® Airbrush Templates can be used to easily render images on the smallest projects, including the complete side graphics on your car as long as your car is only 2 or 3 inches long!

Double-Colored and Translucent CUTTING MATS

Double-Colored and Translucent Cutting Mats

The Artool™ Cutting Mats are the most flexible cutting mats on the market today because they're made of a new, 3-ply high-tech polymer material. Constructed with a self-healing surface, Artool™ Cutting Mats are extremely durable and hold up under repeated use with art and mat knives or rotary cutters. If an Artool™ Cutting Mat should become bent or distorted, simply heat it in sunlight or hot water until it becomes pliable and then lay the mat flat.
